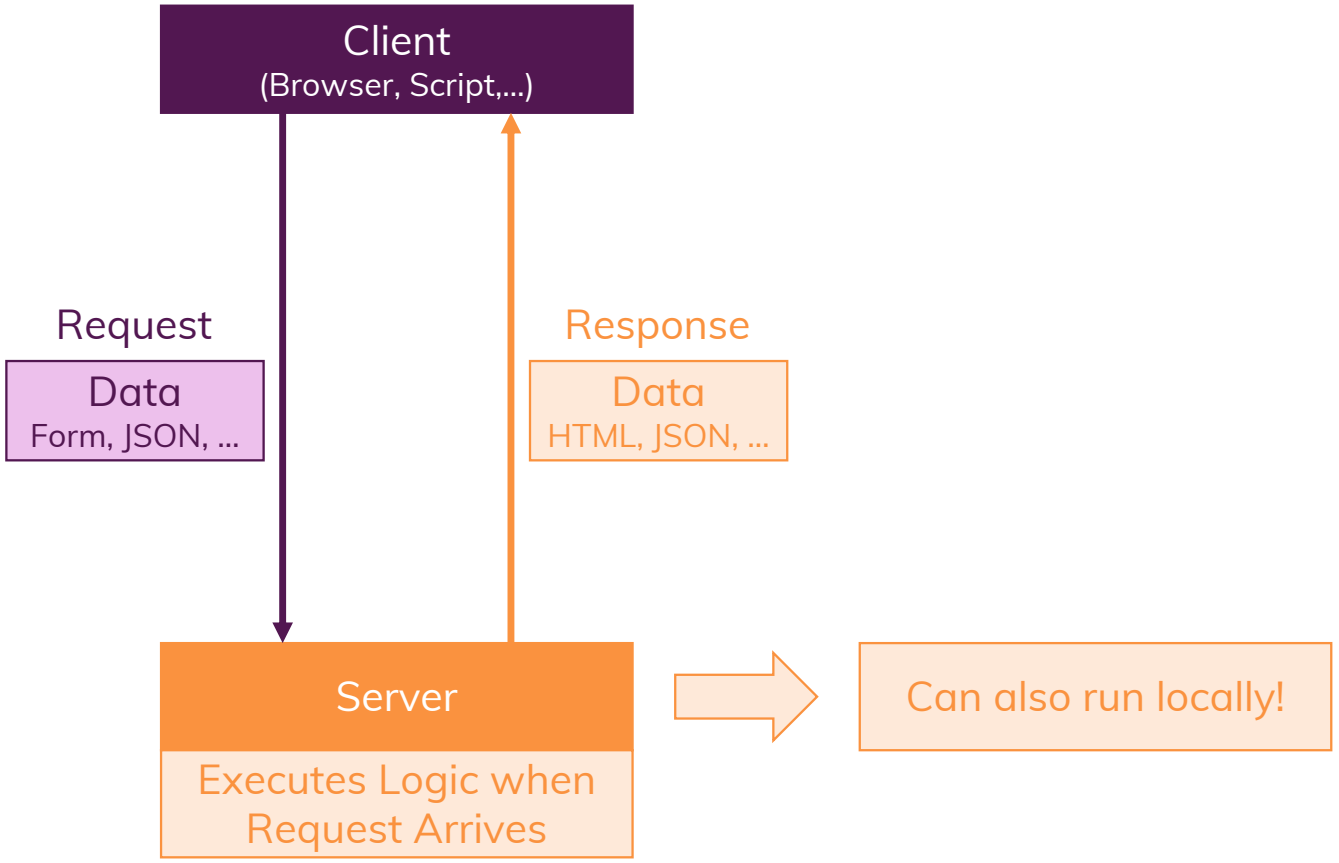
Http Request Basics



Handling Http

Send Http Requests

Covered when we connect the Nodes (Broadcasting)

Target specific URL and send Http Request (with Data) to it

Client (e.g. Browser, other application, Postman, ...)

Accept Http Requests

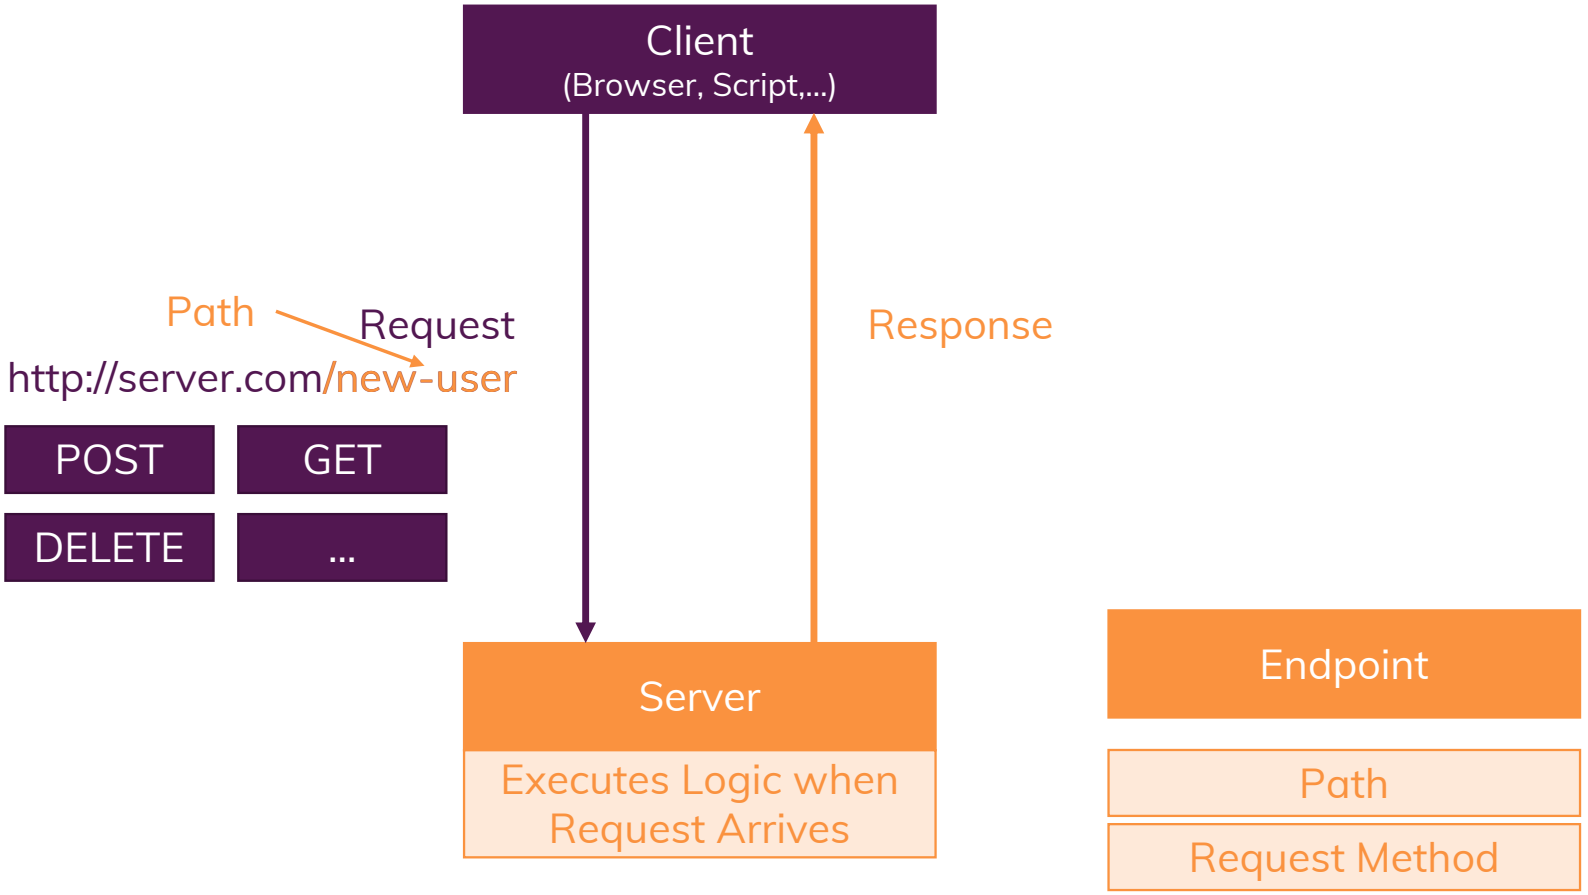
We're building a Web App + Web Server!

Expose "Http Endpoints" (URLs) to which Requests can be sent

(RESTful) API

Return Data (e.g. HTML, JSON)

API Endpoints / URLs



ACADEMIND

Different Types of Requests

POST	Add Data
GET	Retrieve Data
DELETE	Remove Data
PATCH	Update Data
PUT	Replace Data
...
